Intellitar expands Strategic Agreement with MEI Technologies, Inc.

MEI Technologies to Distribute Intelligent Avatar Technology in Mexico

Huntsville, AL — May 17, 2010 — Intellitar Corporation today announced it has expanded its strategic agreement with MEI Technologies, Inc. to include the distribution of the company's Intelligent Avatar Platform™ (IAP) technology in Mexico. MEI Technologies is authorized to sell, license, distribute and support Intellitar's Intelligent Avatar Technology platform throughout Mexico for both government and commercial markets. Intellitar's IAP combines artificial intelligence, image processing and voice capture and synthesis to create intelligent avatars or virtual clones of individuals. These intelligent avatars can provide a wide range of support for internet and web based applications, such as interactive product and customer support, online training and instruction and subject matter expertise for critical knowledge areas.

"We are excited to partner with MEI Technologies, Inc., to bring our technology into the Mexico markets. We have established an outstanding relationship with MEI Technologies and believe they have the right corporate formula to represent our technology in Mexico." said Don Davidson, CEO of Intellitar.

"MEI Technologies is impressed with Intellitar's innovative technology," said MEI Technologies CEO Ed Muñiz. "Expanding our agreement into Mexico markets is a strategic fit with other initiatives underway and we are excited about opening doors to new ways of learning and training in this dynamic country."

About MEI Technologies, Inc.

MEI Technologies, Inc. is a nationwide technology company providing innovative solutions in applied engineering, IT/cyber security, research and development, biotechnology, and optics for public and private sectors. Offering best-value products, services and development support to clients in government and commercial sectors globally, MEI Technologies employs more than 850 employees in seven states with 2009 revenues of over \$140 million.
